TUXEDO

The CCC 9/15 Combines two of our most popular amplifiers!

By taking the front end (preamp) "Flexibility" of the CJ 11 with it's more traditional tone arrangement of volume (with pull gain/mid boost), treble, bass, and master volume and combining it with the JRT 9/15's "Switchable", by toggle "Dual" back end (power amp) of either (2) 6V6GT's at 9 watts or (2) EL84's at 15 watts you get the biggest sound in a low wattage amplifier heard to date, and NOW with the increased "Flexibility" some customers need. Simply stunning tonal variety for all low wattage applications!

- 9 Watts, 2 x 6V6, Class A
- 15 Watts, 2 x EL84, Class AB1
- Cathode Bias
- Single Channel, Dual Modes
- CH 1: V, T, B, MV
- Push/Pull Mid/Gain Boost
- Half Power Switch (9 Watts)
- Tube Rectified (5AR4/GZ34)
- Power Section: Mode 1: 2 x 6V6 GT
- Power Section: Mode 2: 2 x EL84
- Preamp: 12AX7's, 5879
