FIBERREED HH TEN SOFT

Harry Hartmann's Fiberreed is delivered with a medium hard rubber support that enables the reed to vibrate more freely. A Set of four different rubbers (ADDjust Vary Support) allow to achieve your own personal sound.  
ADDjust Vary Support

A Set of four different rubbers exclusively for Harry Hartmann's Fiberreed to replace the original rubber. Different shadings of color makes it easy to recognize: The lighter the color, the softer the sound. The darker the color, the faster is the response.

Fiberreed ...

- \* last 20-30 times longer compared to a cane reed
- \* play 100% from the first second
- \* are extremely durable and resistant against splitting
- \* never dry out because they do not absorb moisture
- \* are always available in exactly the same quality
- \* are easy to clean and therefor hygienic and odourless even after month of use
