JOYO D-SEED DUAL CHANNEL DIGITAL DELAY

This pedal is a Dual Channel Digital-Delay. The initials DCD sound like D-SEED. Impeccable digital delay with a full range of practical functions, D-SEED is a must for guitarists!

Specifications:

- 17ms-1000ms delay time.
- Tap Tempo function: Press the TAP TEMPO switch to set the delay time you want.
- In TAP TEMPO mode, the delay time can be extended to a maximum of 6000ms.
- Dual-channel design with independent parameter settings for each channel.
- Parameters are saved automatically.
- Four delay modes to choose from: COPY, ANALOG, REVERSE, MODULATION
- External trigger input allows external devices to be used to switch between D-SEED channels.
