ELECTRO HARMONIX NANO DOCTOR Q ENVELOPE FILTER

The legendary effect of the old Electro Harmonix Qtron is now generally known as Auto-Wah and had its gory days during the 70's, but even today you can still hear this very noticeable sound. The Nano Doctor Q comes in small package and, like his father, is very suitable for making a funky rhythm guitar even more eye-catching and groovy. With the range knob, you have different sound variants available! With the bass switch, the effect can be directed into lower regions - Doc Q will be a wonderful ear catcher for the bass solo as well!
