JOYO JF-312 IRONMAN PIPEBOMB

The JOYO JF-312 PipeBomb Compressor Mini Guitar Effects Pedal is an exceptional all round Compressor mini guitar effects pedal. The JF 312 mini compressor pedal is taken from the 3rd generation of JOYO pedals a result of 8 years of JOYO technology and expertise. Compact, versatile and with a metal housing will ensure this pedal fits easily onto any board . Flip the lid to keep your tones protected, the LEDs shine through when active. The Pipebomb compressor doesn't change your sound in any way and brings the tone forward with more attack.

"I found these little pedals perfect for a compressor. I tend to set my compressor and then leave it for the rest of the gig,so you can just tuck this little thing out of the way for the rest of the gig. Like it's big brother, it can be subtle, or open it up for some great squashy sustain. Combine it with some subtle overdrive and a pair of humbuckers and you'll get some great feed back without having to use screaming distortion" Matt our UK product guru.

Output volume control
Compressor Sensitivity Adjustment
Mixing ratio for original signal and compressor signal
Attack response time adjustment

True Bypass
Input Impedance:1M
Output Impedance:10K
Running Current 10mA
Power:DC 9V adapter (negative polarity)
Dimensions 73(L) * 43(W)* 50(H)mm

Plug in 9v DC Adapter (not included)
