JOYO JF-307 IRONMAN CLEAN GLASS

The Clean Glass Amp Simulator lets you re-create many of the crystal clear tones that the classic vintage amps from California are known for. But it can do more, it packs a nice dose of gain and can deliver amazing lead sounds as well. Whether you use it direct into a mixing console, audio interface or in front of your amp, the clean glass will make you tone sparkle.

The JOYO Ironman pedals are very compact, versatile and housed in a solid metal case, with no compromise on the huge tones crammed inside this tiny pedal.

Flip your lid to keep your preferred tones protected, activate TRUE Bypass and the LEDs shine through, a very nice touch. The Ironman mini guitar pedal range are all supplied with 3M velcro and rubber pads for securing in place on your board.

Controls:

- Tone Control
- Drive / Gain
- Mid boost Control
- Output

Powered by a 9v DC Adapter (not included)

Specifications:

- True Bypass
- Input Impedance:1M
- Output Impedance:10K
- Running Current 25mA
- Power:DC 9V adapter (negative polarity)
- Dimensions 73(L) * 43(W) * 50(H)mm

Dimensions:

- 7.3cm long
- 4.3cm wide
- 5 cm high

Weight : 220g
