STRYMON MULTISWITCH

Want to unlock the full functionality of TimeLine's looper? Or discover a new means of exploring presets on TimeLine, BigSky, or Mobius? Connect MultiSwitch to your TimeLine, BigSky, or Mobius with the included 1/4" TRS cable and add a new dimension to your rig.

Connect to TimeLine, BigSky, or Mobius via expression pedal jack

Latest TimeLine, BigSky, and Mobius firmware provides several Expression Modes compatible with MultiSwitch:

- Loop Control Mode (TimeLine only)
- Bank Mode
- Preset Mode
- Tap Mode

1/4" right-angle TRS cable included

No additional power supply required

Rugged gunmetal gray anodized aluminum chassis

Small and lightweight

Designed and built in the USA
