LP LP234C

Developed and introduced by LP over 40 years ago, the Afuche®/Cabasa has become one of the most essential percussion instruments in history. Loops of steel bead are wrapped around a textured cylinder to produce a variety of scraping rhythmic patterns. Available in multiple sizes, the larger versions produce greater volume.

5-1/4" diameter Afuche/Casaba with wooden frame and handle

Beads can be rotated around the textured steel or the instrument can be spun or shaken for varying sounds

Patented
