BEHRINGER DI 800

The ULTRA-DI PRO DI800 is a professional mains/phantom powered 8-channel DI-box. It converts unbalanced line inputs into balanced outputs, featuring optional mains or phantom powered operation. Its servo balanced operation assures ultra-flat frequency response. Additionally, it allows direct connection to speaker outputs with up to 3,000 Watts. A ground lift switch as well as input attenuation/gain per channel round off this powerful device.

Caratteristiche

- # DI-Box professionale a 8 canali con alimentazione Mains/Phantom
- # Resp. di frequenza piatta dovuta alle operazione servo bilanciate
- # Connessione diretta alle uscite speaker con una potenza nominale fino a 3000 Watt
- # Converte i livelli tra -10 dBV a +4 dBu
- # Connettori XLR e 1/4" TRS placcati in oro
