TC ELECTRONIC POWERCORE 6000

DIGITAL AUDIO WORKSTATION

PowerCore 6000 comprende 8 motori FreeScale DSP, gli stessi usati in System 6000, e comprende un redesign della SRAM in modo da supportare facilmente riverberi e delays ad alta performance: questo permette agli utenti di utilizzare i riverberi e i delays del System 6000 con Logic Pro, Cubase ed altre host per VST e AU.

PowerCore 6000 include anche 7 nuovissimi algoritmi, portati tal quali dal System 6000: VSS3 Stereo Source Reverb, Niolin2, DVR 2 Digital Vintage Reverb, MD3 Stereo Mastering, Brickwall Limiter, UnWrap Stereo to 5.1 e TapFactory.

Caratteristiche

- # Pristine algorithms from TC's high-end System 6000 processor
- # 8 Freescale DSPs
- # SRAM based memory design supporting high performance reverbs and delays
- # For Mac and PC, Audio units and VST
- # Plug-ins:
 - # VSS3 Stereo Source Reverb
 - # MD3 Stereo Mastering
 - # BrickWall Limiter
 - # NonLin 2 Stereo Effects Reverb
 - # DVR2 Digital Vintage Reverb
 - # UnWrap Stereo to Surround Conversion
 - # TapFactory Multi-tap Delay
- # PowerCore 6000 also includes the 14 base package plug-ins known from PowerCore X8
- # PowerCore 6000 is compatible with all PowerCore 3rd party plug-ins
