Collezione di campioni ritmici adatti al cinema

The Cinematic Textures Expansion is a collection of rhythmic gestures ranging from esoteric patterns to dense pulses and beats. Designed to enhance film and television scores, and to intensify the texture of electronic and electro-acoustic music, this expansion is geared towards composers, producers and sound designers alike. With 71 presets and over 700 samples, Cinematic Textures was made with sonic exploration in mind. Delve into both percussive and tonal elements to inspire new ideas for your future musical works.
