

## GE150 PRO LI - GUITAR MULTI-EFFECTS PROCESSOR

**199,00 € tax included**

Reference: MOOEFPEGE15PL

Pedaliera Multieffetto Ricaricabile per Chitarra Elettrica

- Designed based on MOOER's updated GE series design language
- Four multi-purpose footswitches for browsing presets and triggering a wide range of functions
- Built-in lithium battery, approx. 9 hours of battery life
- 55 classic amp preamps based on MOOER's in-house MNRS modeling technology
- 26 high-quality cabinet simulations
- 10 slots for third-party IR cabinet simulation files
- 200 factory preset tones.
- Expression pedal that supports both parameter control and output volume control.
- Built-in 80-second stereo LOOPER function.
- Precise built-in instrument tuner
- Built-in drum machine module with 40 drum rhythms and 10 metronome modes
- Type-C USB interface supports connecting to a computer for tone editing, data management, and firmware updates
- OTG connectivity that facilitates audio recording and playback.
- AUX In interface supports line-in audio input, allowing connection to mobile phones or external audio players for practice.
- Lightweight and compact, ideal for traveling musicians
- Includes power adapter, USB cable, and quick guide
